

# Cloud Migration + Enablement

## Why and how to successfully transition to the cloud

Nothing is more critical to your business than a coherent, de-risked cloud strategy. The problem is knowing where to start. Cloud offerings are increasing and already confusing vendor space is becoming difficult to navigate. We can help you map out your strategy, prioritize your cloud enablement objectives, and speed your adoption of the right cloud services for your business.

### What is Cloud Enablement?

The IT industry is repositioning infrastructure, databases, and applications to take advantage of cloud economics. This is a huge undertaking, but absolutely critical to realize cloud benefits. IT infrastructure needs to be retooled from on-prem bare metal to cloud-ready virtual machines. Databases and applications need to be analyzed and prepped for migration to PaaS and SaaS offerings. Working through these cloud enablement tasks with an experienced partner helps insure a successful outcome.

#### The Value

- Cloud economies of scale are powerful enablers
- Today's business analytics and AI tools require cloud resources and scale

#### The Proof

- Cloud IaaS and PaaS services can lower operational costs by 20–30 percent
- Cloud services is faster to market and cost effective

#### The Outcomes

- Configure your deployment in a way that makes the most sense for your organization
- Scale resources up or down for your application needs

### What the industry is saying

"Hybrid cloud solution providers can help enterprises successfully achieve digital transformation by enabling them to focus on innovative and transformative software development. By choosing to leverage a fully managed and integrated hybrid cloud platform, companies are freed from the responsibility of building and operating complex infrastructure."

— *Forbes*

### The Capax Difference

We'll also help you transition and transform, leveraging our experience with successful cloud solutions—we know what works.

At Capax Global, our team has an unmatched background in commercial application development which makes our modern application development, data platform modernization and advanced analytics practices enterprise class. We will be with you for your entire journey, no matter where you are starting from, using our IDEA-based approach: Innovate, Design, Execute, and Achieve.
