

# Data Science OnDemand

Extract knowledge from data in any form

Data science initiatives can deliver significant value to enterprises when the right opportunities are identified, the culture uses data to make decisions, and new talents and technology are explored.

## What is Data Science?

Implementation and advisory services that aid in the creation and advancement of analytics initiatives that deliver ROI with production capable solutions in less than six months. Analytics strategy, data pipelines, cloud analytics and modeling via machine learning are delivered in partnership with you.

### The Value

- Improve client's experience with better insights and predictions
- Increase revenue through better segmentation of products and clients

### The Proof

- 93 percent reduction in data acquisition time
- 14 percent improved sales forecasting

### The Outcomes

- Influence your culture
- Open the black box
- Results in production
- Reduce time to market and operational costs with fraud and waste detection

## What the industry is saying

"By the end of 2017, revenue growth from information-based products will double the rest of the product/service portfolio for one-third of Fortune 500 companies, says International Data Corporation. The opportunities exist, Capax Global's Data Science on Demand helps customers find and harvest them while achieving independence."

— *Forbes*

## The Capax Difference
