

Develop with Confidence

Embrace modern development with your team

Modern application development is complex, and budgets are limited. Tools and process can help, but adopting them can be an uncertain proposition.

What is Development?

Capax Global will help you adopt the same processes and tools we use for our own projects. That includes continuous delivery, continuous integration, iterative (scrum) development, test driven development and more.

The Value

- Predictable delivery
- High-quality code
- Respond to Change

The Proof

- Current state assessment
- Defined test plans
- Automated builds and tests
- Iterative project plans

The Outcomes

- See your team's results early and often
- Frequent feedback built into your process

What our clients say

"[Our business] has been pushing some digital boundaries lately—in areas where we needed technical guidance, skilled resources, and solid results. Capax Global brought all of those to the table, plus an amazing ability to 'get' the unique aspects of our products and markets."

—IDEX Industry Reference

The Capax Difference

Capax Global will create an assessment of your current state, an implementation plan, and mentor your staff in adopting that plan.

At Capax Global, our team has an unmatched background in commercial application development which makes our modern application development, data platform modernization and advanced analytics practices enterprise class. We will be with you for your entire journey, no matter where you are starting from, using our IDEA-based approach: Innovate, Design, Execute, and Achieve.
