

Skype for Business

User voice to deliver a collaborative platform

Skype for Business provides one platform for meetings and voice. It will reduce costs by avoiding per-minute audio conferencing provider costs and PBX maintenance/PSTN costs. Administrators will save time with one solution that is easy to setup and provide to new users. It will also boost employee and team productivity from anywhere, on any device, on one platform, by supporting telecommuting/telework scenarios.

What is Skype for Business?

Skype solves the problem of fragmented communication solutions and the lack of functionality across a multitude of devices. Most communications platforms are incredibly complicated, expensive and unreliable. Skype for Business Online provides a simple, secure, and flexible solution.

The Value

- Modern voice with cloud PBX
- Communications solution
- Security, compliance, control, and reliability

The Proof

- One platform for meetings
- Reduce conferencing costs
- Save administrative time by using one solution

The Outcomes

- Boost productivity from anywhere on one platform
- Reduce costs for conferencing and voice

What the industry is saying

"Working together to make product and business decisions faster is the key to success for [Kraft Heinz]. We see PSTN Conferencing and Cloud PBX through Skype for Business as a great opportunity to help employees connect quickly wherever they are."

—Leandro Balbinot, North America CIO, Kraft Heinz

The Capax Difference
